SMTV - *A Smart Media TV that provides a superior entertainment experience for your guests that includes a media platform to drive revenue through in-room marketing.*

Bring the expectation of home to your guest rooms and elevate their experience so they return and refer others to your property.

Traditionally in-room entertainment solutions have been a cost to the property. Its time for change.

It's easy.
SMTV provides a total solution for your property. No third party integrators. It includes the TV, technology, software, delivery, installation, warranty and support. It is easy to operate and easy to manage delivering peace of Mind.

It's supremely secure.
No logins required to streaming applications, your guests' identity leaves the room when they do. No privacy issues. The experience will have guests returning and referring others to your property.

It's affordable.
We offer a monthly payment model so you can retain your capital. No need to pay for third party subscriptions like Foxtel or Netflix. Turn your guest TV into a revenue generator by promoting your venues services & local businesses.

SMTV is a Smart Media TV that allows guests to stream directly from their own device to the TV including a media platform to build additional revenue by promoting your property services and local businesses.

Why we're here
After decades in the industry, we wanted to come up with something that acknowledges not everyone has the capital or technical knowledge to meet the demanding market standards.

Guestv is a customer driven organisation that exists to support local hotels and motels raise their level of guest experience. We found one of the best ways to do this is through an easy, secure & affordable entertainment solution that can increase revenue.

How it works

Its simple! One monthly payment that includes everything your property needs to allow guests to stream content from their own device for a far better personalised viewing experience. It includes a media platform to promote your property and local businesses to grow revenue through advertising services. It also includes a Smart Hospitality TV, SMTV software SmartCast and SmartStuff, Chromecast, Cloud Hosting Services, Support, Warranty, Delivery and Installation.

The Product

SMTV comes with three main elements:

1. A Smart Android Hospitality Television
2. SmartCast
3. SmartStuff

Smart Android Hospitality TV

If you are looking to upgrade your televisions and want a simple, customised managed guest experience then SMTV is for your venue. Leaving un-managed televisions in an accommodation premise allows guests to make changes and potentially causes frustrations for your next guest. There are also potential privacy issues with guest data being left on the television or casting to other guest rooms. Our televisions and custom software, SMTV, eliminate these issues.

Scan the QR code to see our SMTV television models and specifications.

guestv
Easy. Secure. Affordable.

About Us

Guestv is the exclusive distributor of SMTV by Smarttv.cloud for Australia, New Zealand and Fiji.

Smarttv.cloud is an Australian owned technology company and provides the SMTV product range which has been designed locally in Australia.

Unlike other entertainment providers, Smarttv.cloud do not sell other company's technologies. You are dealing with the decision makers that have a real interest in making things work.

Smarttv.cloud is responsible for the delivery, installation and support of SMTV products and solutions.

SmartCast

Guest streaming to the in-room television from their portable device has never been easier.

SMTV has a safe and secure application for allowing guests to use their own devices, iPhone, Android, iPad, Tablet or Laptop to stream content to the in-room television. Guests now carry multiple portable devices for several functions which include real-time sports events, movie content and subscription services.

SmartCast application allows guests to stream content from their own device to the television for a far better personalised viewing experience. This broadens the properties offering as sometimes overheads of extra pay TV channels are costly.

The SMTV application utilises the properties Wi-Fi infrastructure for secure access. Every guest room has a unique login through a QR code displayed on the TV which creates an isolated connection

Guests cannot cast content to other rooms.

SmartStuff

Provide your guests with additional services to create value and income for your property. SmartStuff is fully customisable application hosted in the cloud. This allows the information displayed to be changed anytime. No need to print brochures or have display stands in your foyer. Promote services on your guest tv and build an income stream as well as reducing costs.

Create a Home page - Build your home page with images or video to welcome your guest. Enhance the look and professionalism of your property

In-Room Dining Experience - Provide your guests with the ease of ordering from your restaurant directly from their room. No need for menu's and calls to reception or the restaurant. Save time and money

Compendium – a dedicated page to provide guests with information about your property - alleviates printing and can be updated instantly to all rooms.

Additional Information and Services - Provide guests with information about local restaurants, places to visit, upcoming events and attractions on SMTV. This provides an opportunity to build revenue by promoting and advertising local businesses.
